n8n Gmail Integration

Overview

This repository contains the Topic 10 Gmail Integration workflow created using n8n.

The project demonstrates how to connect n8n to Gmail and send personalized plain-text emails using dynamic customer information.

Workflow Name

```
Topic 10 Gmail Integration Workflow
```

Workflow Architecture

```
None
Manual Trigger
      |
      v
Mock Customer Data
      |
      v
Send Personalized Email
```

Technologies Used

- n8n Cloud
- Gmail
- Gmail OAuth2 Authentication
- Dynamic Expressions
- JSON Data

Workflow Nodes

1. Manual Trigger

Starts the workflow manually using Test Workflow.

2. Mock Customer Data

Creates customer information using the Edit Fields (Set) node.

Configured fields:

- customerName: Alice Smith
- customerEmail: User-accessible email address configured privately in n8n

3. Send Personalized Email

Uses the Gmail node to send a personalized plain-text email.

Recipient expression:

```
None
{{ $json.customerEmail }}
```

Subject expression:

```
None
{{ 'Welcome to N8N Course, ' + $json.customerName + '!' }}
```

Message body expression:

```
None
{{ 'Hi ' + $json.customerName + ',\n\nCongratulations on completing Topic 10 of the N8N Hands-On Beginner Course!\nThis personalized email was sent automatically using dynamic content from a previous node.\n\nBest regards,\nYour Automation Engine' }}
```

Authentication

Gmail was connected using the Sign in with Google OAuth2 authorization option in n8n.

No passwords, OAuth client secrets, or private credentials are included in this repository.

Testing Results

The workflow was executed successfully and the updated personalized email was delivered and verified.

Latest Gmail output:

- Message ID: `1a1cfb235060892b`
- Thread ID: `1a1cfb235060892b`
- Label: `SENT`

Expected Result

The recipient receives a personalized plain-text email with:

Subject: Welcome to N8N Course, Alice Smith!

Greeting: Hi Alice Smith,

The message congratulates the recipient on completing Topic 10 of the N8N Hands-On Beginner Course.

Project Status

Completed and successfully tested according to the trainer's requirements.
